

## Spray Guard

### Protection for Concrete Mixing and Transport Equipment

#### DESCRIPTION

Spray Guard is a blend of selected oils and compounds designed to protect valuable concrete mixing equipment.

Spray Guard provides protection to mixing and transport equipment by creating a barrier between the steel and fresh concrete. It also assists in removing any old hardened concrete build up.

#### USES

All mixing and transporting equipment in contact with fresh concrete.

#### METHOD OF USE

Spray Guard should be spray applied over the equipment at least once a week.

#### ADVANTAGES

- \* Provides a protective coating to eliminate concrete adhering to component surfaces.
- \* Neutralises the corrosive action of cement on metal parts.
- \* Reduces expensive downtime by eliminating removal of hardened concrete.

#### STORAGE AND SHELF LIFE

Minimum 1 year in sealed containers stored in dry warehouse condition (+5°C - +25°C). Protect from frost.
